Fuel Price

Temperature

Unemployment

As data analysts, how do we utilize the information at our disposal?

Goal: To transform Walmart by leveraging data to optimize business operations.

Through data analysis, we sift through vast amounts of information to focus on key insights that directly drive strategic decisions and outcomes.

- Key focus:

- > *Economic Trends for Sales Predictions* 
- > *Holiday Sales*  *vs. Non-Holiday Sales* 
- > *Temperature's Effect on Sales*

Data We Wish Our Team Had ?

- 1. Having distinct categories like essential vs non-essential goods.**
- 2. Having Products by category to better understand what is usually purchased during periods where temperature is high, low, or moderate, etc.**
- 3. Having long term sales so we could extract more data from CPI**
- 4. Having locations of the stores to extract socioeconomic and demographic relationships**
- 5. Having specific Holiday flags (like 4 July, Christmas, etc)**

Thank you!!

- Any Question ? :D
